Hello! In our opinion, "LISZT Transcendental Etude nº12" takes on a new life in this jazzy and classical interpretation, where it transforms into an immersive sound narrative. Intense tremolos, chromatic cascades and a meticulously constructed crescendo paint a vivid portrait of the chaos and beauty of natural forces, evoking both the original romantic spirit and a more modern mysticism. The interpretation carries an intriguing psychological depth, balancing lyricism and virtuosity without sounding overly grandiose, leaving room for nuances that keep the piece vibrant and resonant.
